Ecological Modelling 86 (1996) 310–311

ECOLOGICAL MODELLING

Contents of *Ecological Modelling*, Vol. 86

VOL. 86 NO. 1 APRIL 1996

Energy flow through the Lake Ontario food web: conceptual model and an attempt at mass balance
E. Halfon, N. Schito (Burlington, Ont., Canada) and R.E. Ulanowicz (Solomons, MD, USA) 1
Hierarchical approach to forest ecosystem simulation
J. Luan, R.I. Muetzelfeldt and J. Grace (Edinburgh, UK) 37
Modeling forest growth. I. Canonical approach
E.O. Voit (Charleston, SC, USA) and P.J. Sands (Sandy Bay, Tasmania, Australia) 51
Modeling forest growth. II. Biomass partitioning in Scots pine
E.O. Voit (Charleston, SC, USA) and P.J. Sands (Sandy Bay, Tasmania, Australia) 73
Effect of changing habitat on species: application to Keoladeo National Park, India
J.B. Shukla and B. Dubey (Kanpur, India). 91
Coupling a spatially-explicit forest gap model with a 3-D solar routine to simulate latitudinal effects
J.F. Weishampel (Orlando, FL, USA) and D.L. Urban (Durham, NC, USA) 101

Special Issue

Environmental and Ecological Models for Simulation and Management

Editorial vii

An abstract object model of an animal's environment
B. Durnota (Caulfield East, Australia) 119
Uncertainty in ecological catastrophe
K.-i. Tainaka (Ibaraki, Japan) 125
Validating models of complex, stochastic, biological systems
T.N. Brown and D. Kulasiri (Canterbury, New Zealand) 129
Modelling the long-term behaviour of evanescent ecological systems
P.K. Pollett (Brisbane, Qld., Australia). 135
UFIS: a database of ecological models
M. Knorrenschild, R. Lenz, E. Forster and C. Herderich (Oberschleissheim, Germany). 141
A simulation model of wind-driven dispersal of *Helicoverpa* moths
M.L. Dillon, G.P. Fitt (Narrabri, N.S.W., Australia), J.G. Hamilton (Canberra, A.C.T., Australia) and W.A. Rochester (Brisbane, Qld., Australia). 145
A simulation model of the long-distance migration of Helicoverpa spp. moths
W.A. Rochester, M.L. Dillon, G.P. Fitt (Narrabri, N.S.W., Australia) and M.P. Zalucki (Brisbane, Qld., Australia) . 151
Roles for deterministic bounding in environmental modelling
J.P. Norton (Birmingham, UK) 157

Modelling heat and mass transfer in drying of biological materials: a simplified approach to materials with small dimensions
D. Kulasiri and S. Samarasinghe (Canterbury, New Zealand) 163
Modelling groundwater flow in the North Stirling Land Conservation District, Western Australia
J. Gomboso, F. Ghassemi and A.J. Jakeman (Canberra, A.C.T., Australia) 169
Modelling land-cover-induced variations in hydrologic response: Picaninny Creek, Victoria
D.A. Post, A.J. Jakeman (Canberra, A.C.T., Australia), I.G. Littlewood, P.G. Whitehead (Wallingford, UK) and M.D.A. Jayasuriya (Melbourne, Vic., Australia) 177
Overview of a simple model describing variation of dissolved organic carbon in an upland catchment
E.W. Boyer, G.M. Hornberger (Charlottesville, VA, USA), K.E. Bencala and D. McKnight (Menlo Park, CA, USA). 183
The hydrological response of catchments to simulated changes in climate
N.R. Viney and M. Sivapalan (Nedlands, W.A., Australia). 189
Fossil fuel emissions required to achieve atmospheric CO_2 stabilisation using ANU-BACE: A box-diffusion carbon cycle model
J.A. Taylor (Canberra, A.C.T., Australia) 195
Managing sheep grazing systems in southern Australia to minimise greenhouse gas emissions: adaptation of an existing simulation model
S.M. Howden, D.H. White (Queen Victoria Terrace, A.C.T., Australia) and P.J. Bowman (Attwood, Vic., Australia) 201
Simulating the impact of acidifying farming systems on Australian soils
J.B. Robinson and K.R. Helyar (Wagga Wagga, N.S.W., Australia) 207
Modelling agricultural and pastoral systems under environmental change
D.H. White, S.M. Howden and H.A. Nix (Canberra, A.C.T., Australia) 213
Simulation modelling to determine suitability of agricultural land
M. Littleboy, D.M. Smith and M.J. Bryant (Indooroopilly, Qld., Australia) 219
Land degradation in African pastoral systems and the destocking controversy
I. Hary, H.-J. Schwartz, V.H.C. Pielert and C. Mosler (Berlin, Germany) 227
Effect of environmentally degraded soil on crop yield: the role of conservation
A. Shukla (Gwalior, India), B. Dubey and J.B. Shukla (Kanpur, India) 235
TACT: a tactical decision aid using a CERES based wheat simulation model
D.G. Abrecht and S.D. Robinson (South Perth, W.A., Australia) 241
Defining the white clover zone in eastern mainland Australia using a model and a geographic information system
M.J. Hill (Armidale, N.S.W., Australia) 245
Mortality simulations in *Pinus radiata* plantations in the Tarawera Valley regimes trial
O. Chikumbo, R.N. James, I.M.Y. Mareels and B.J. Turner (Canberra, A.C.T., Australia) 253
Study on fish mortality caused by the combined effects of pesticides and changes in environmental conditions
M. Sekine, H. Nakanishi and M. Ukita (Yamaguchi, Japan) 259
Interdisciplinary methods for successful ecological simulation
P.J. Radford and J.C. Blackford (Plymouth, UK). 265
A parametric numerical model for lake hydrodynamics
Y. Ogihara, K. Zic, J. Imberger and S. Armfield (Perth, W.A., Australia) 271
Some aspects of using the SimuSolv program for environmental, pharmacokinetics and toxicological applications
T.D. Rey (Midland, MI, USA) and W.A. Havranek (Sussex, UK) 277
The Rothamsted soil-carbon turnover model – discrete to continuous form
A. Parshotam (Palmerston North, New Zealand) 283
Sensitivity evaluation of environmental models using fractional factorial experimentation
B. Henderson-Sellers and A. Henderson-Sellers (Sydney, Australia) 291
Logistic sensitivity and bounds for extinction risks
M.A. McCarthy, M.A. Burgman (Parkville, Vic., Australia) and S. Ferson (Setauket, NY, USA) 297
